CleanPowerSF

Your local, clean electricity provider

Clean wind energy is on the way!

Hi SuperGreen customer! The label below highlights CleanPowerSF's plan to power your home or business with 100% renewable energy in 2022. Thank you for being a SuperGreen customer and helping to build a clean energy future!

2022 PROSPECTIVE PRODUCT CONTENT LABEL[1]

SuperGreen matches 100% of your electricity usage with certified renewable energy. In 2022, SuperGreen will be made up of the following new renewable energy resources averaged annually.

Green-e® Energy Certified New[2] Renewables in SuperGreen

Resource Type	Total Certified Renewables	Generation Location
Solar	50%	California
Wind	50%	California

Total Green-e® Energy Certified Renewables: 100%

1. These figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before October 1 of next year in the form of a Historical Product Content Label the actual resource mix of the electricity you purchased.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

For comparison, the current average mix of resources supplying California includes: Eligible Renewables (33.1%), Large Hydroelectric (12.2%), Coal (2.7%), Natural Gas (37.1%), Nuclear (9.3%), Other (0.2%), and Unspecified Power (5.4%). This resource mix was estimated by the California Energy Commission based on the electricity sold to California consumers during 2020.

The average home in San Francisco uses 315 kWh per month. Source: CleanPowerSF/PG&E Joint Rate Comparison.
